IMPACT YEAR REPORT

2023

CARBON FOOTPRINT (BY SCOPE)

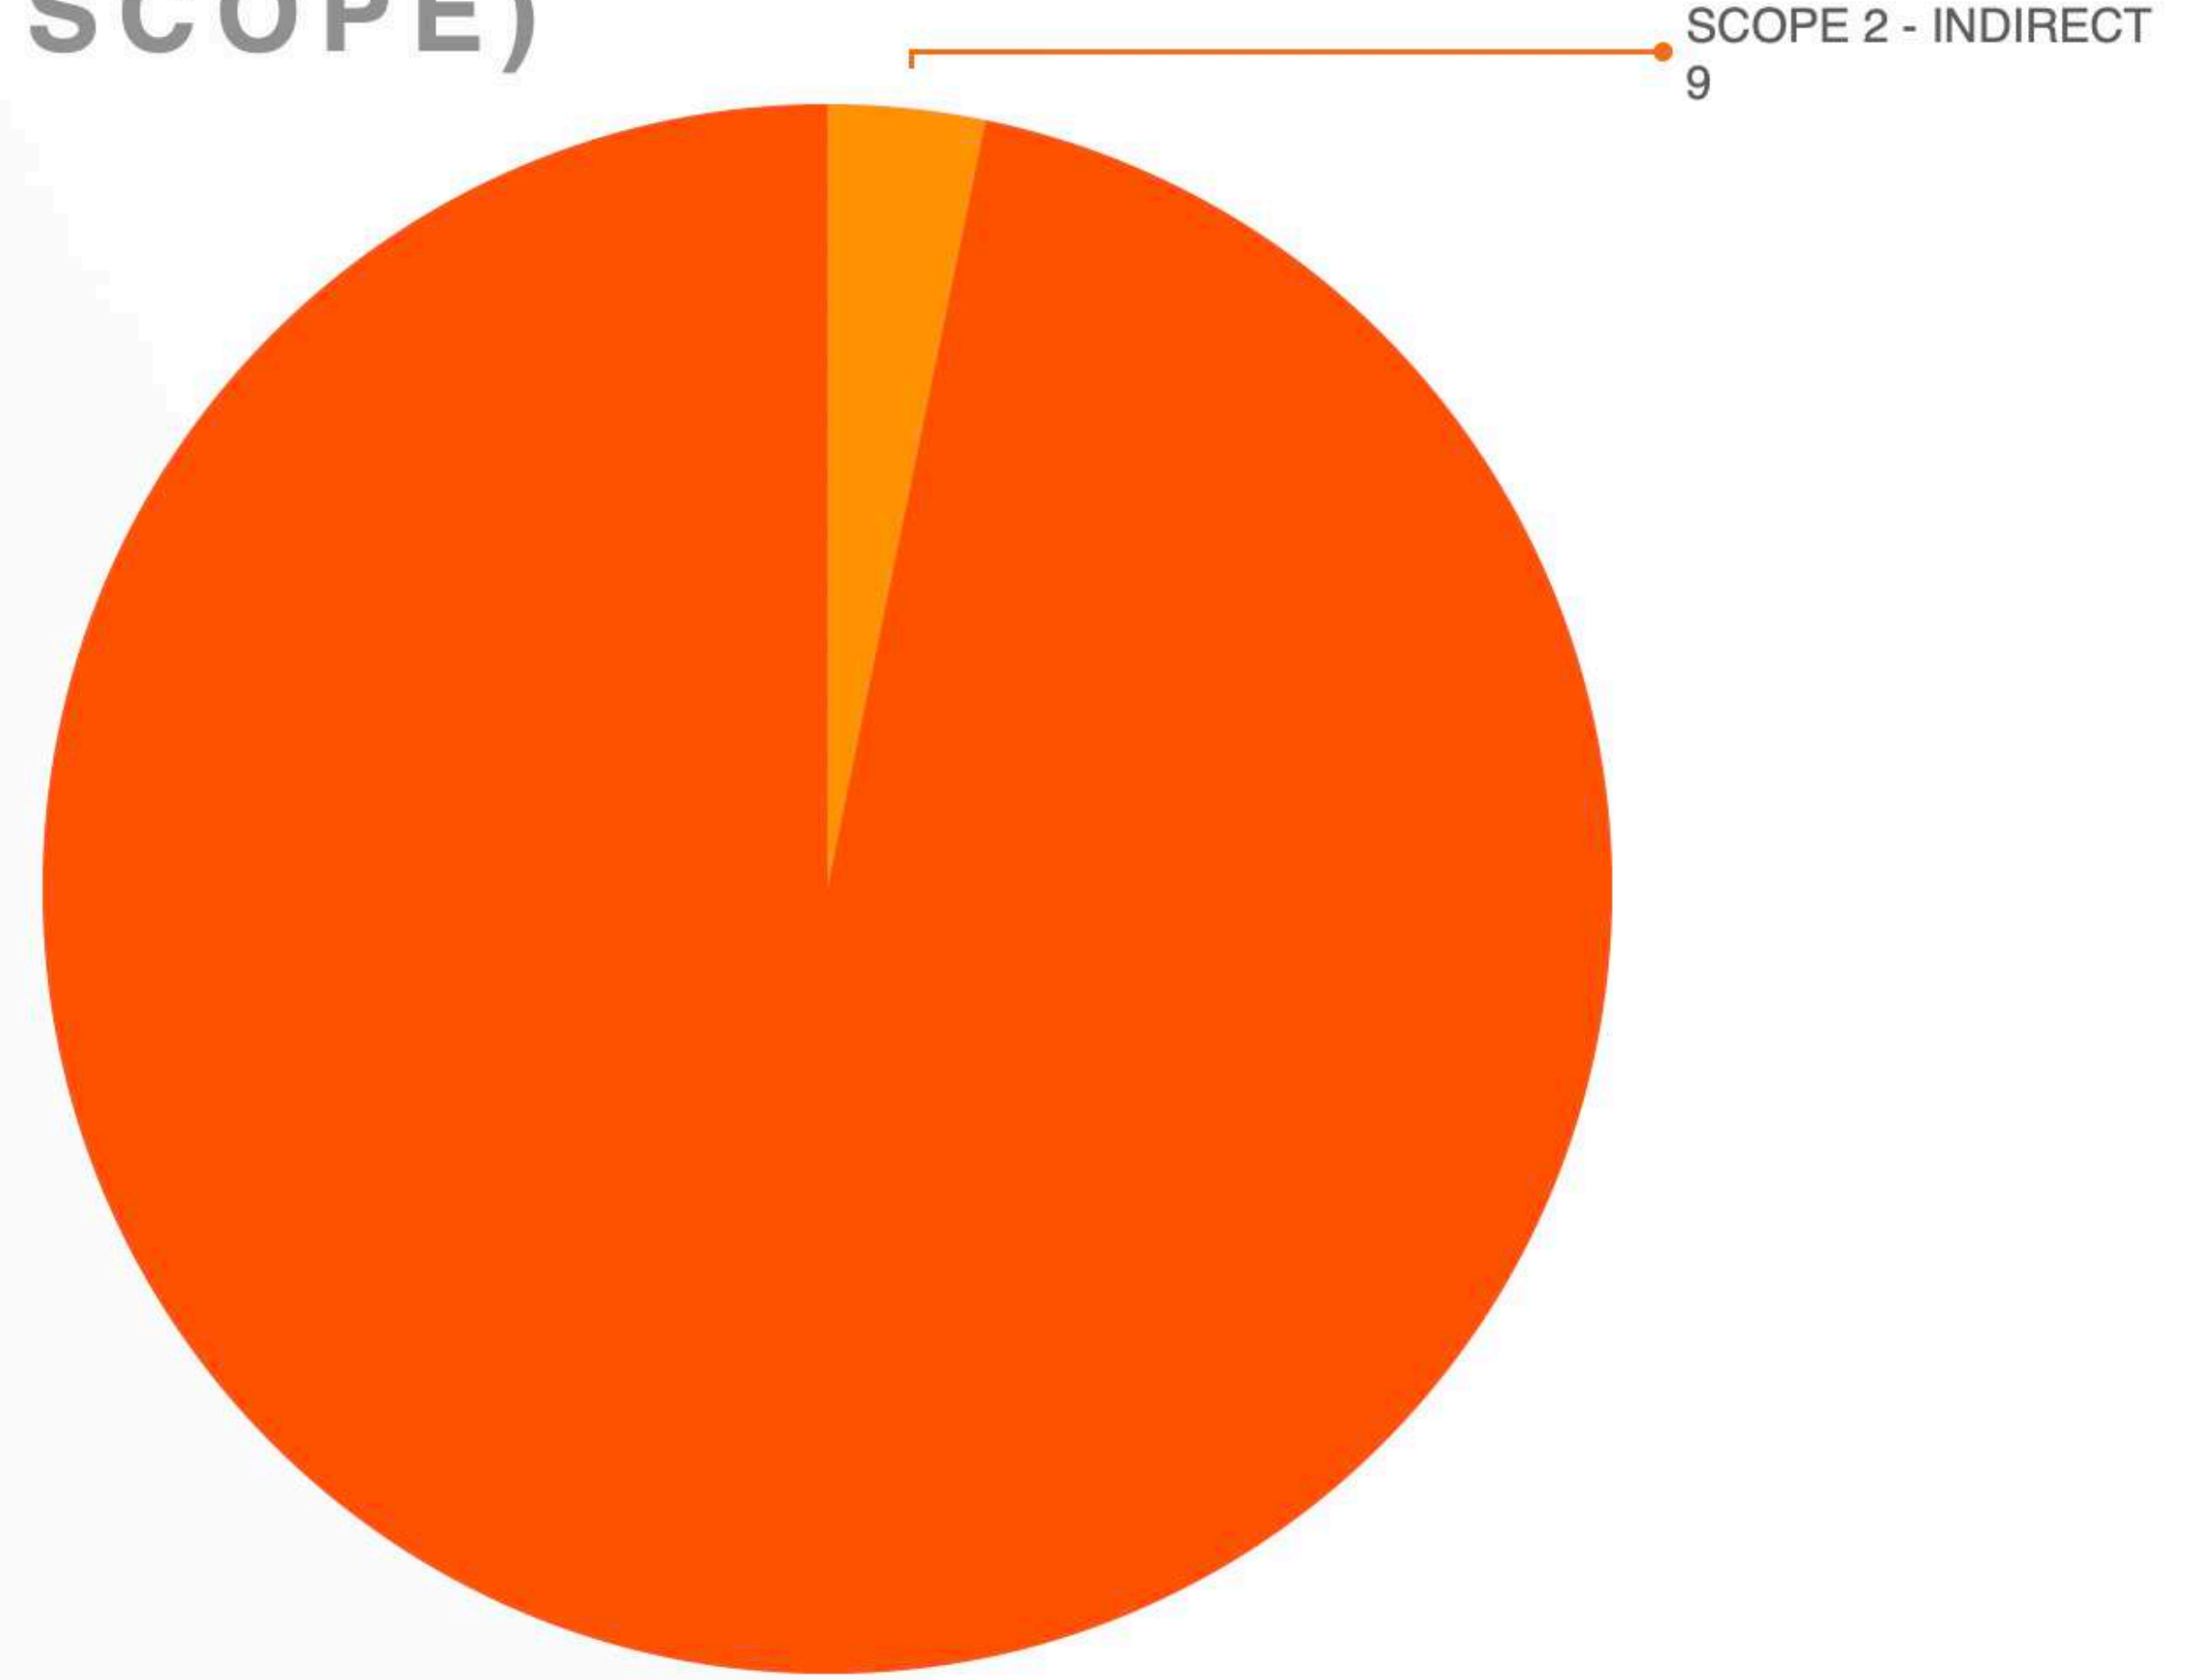

KEY PRODUCTION

CARBON FOOTPRINT IN 2023:
278* Tonnes CO2

Carbon Balancing under Plan Vivo

SCOPE 3 - VALUECHAIN
269

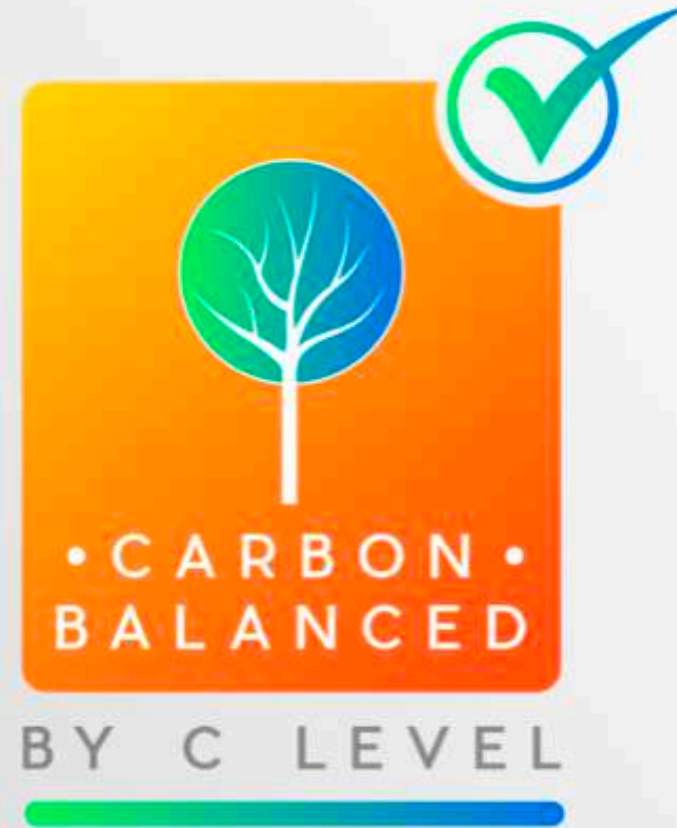

BIGGEST IMPACTS
96.76% FROM SCOPE 3
3.24% FROM SCOPE 2

*10% CONTINGENCY ADDED

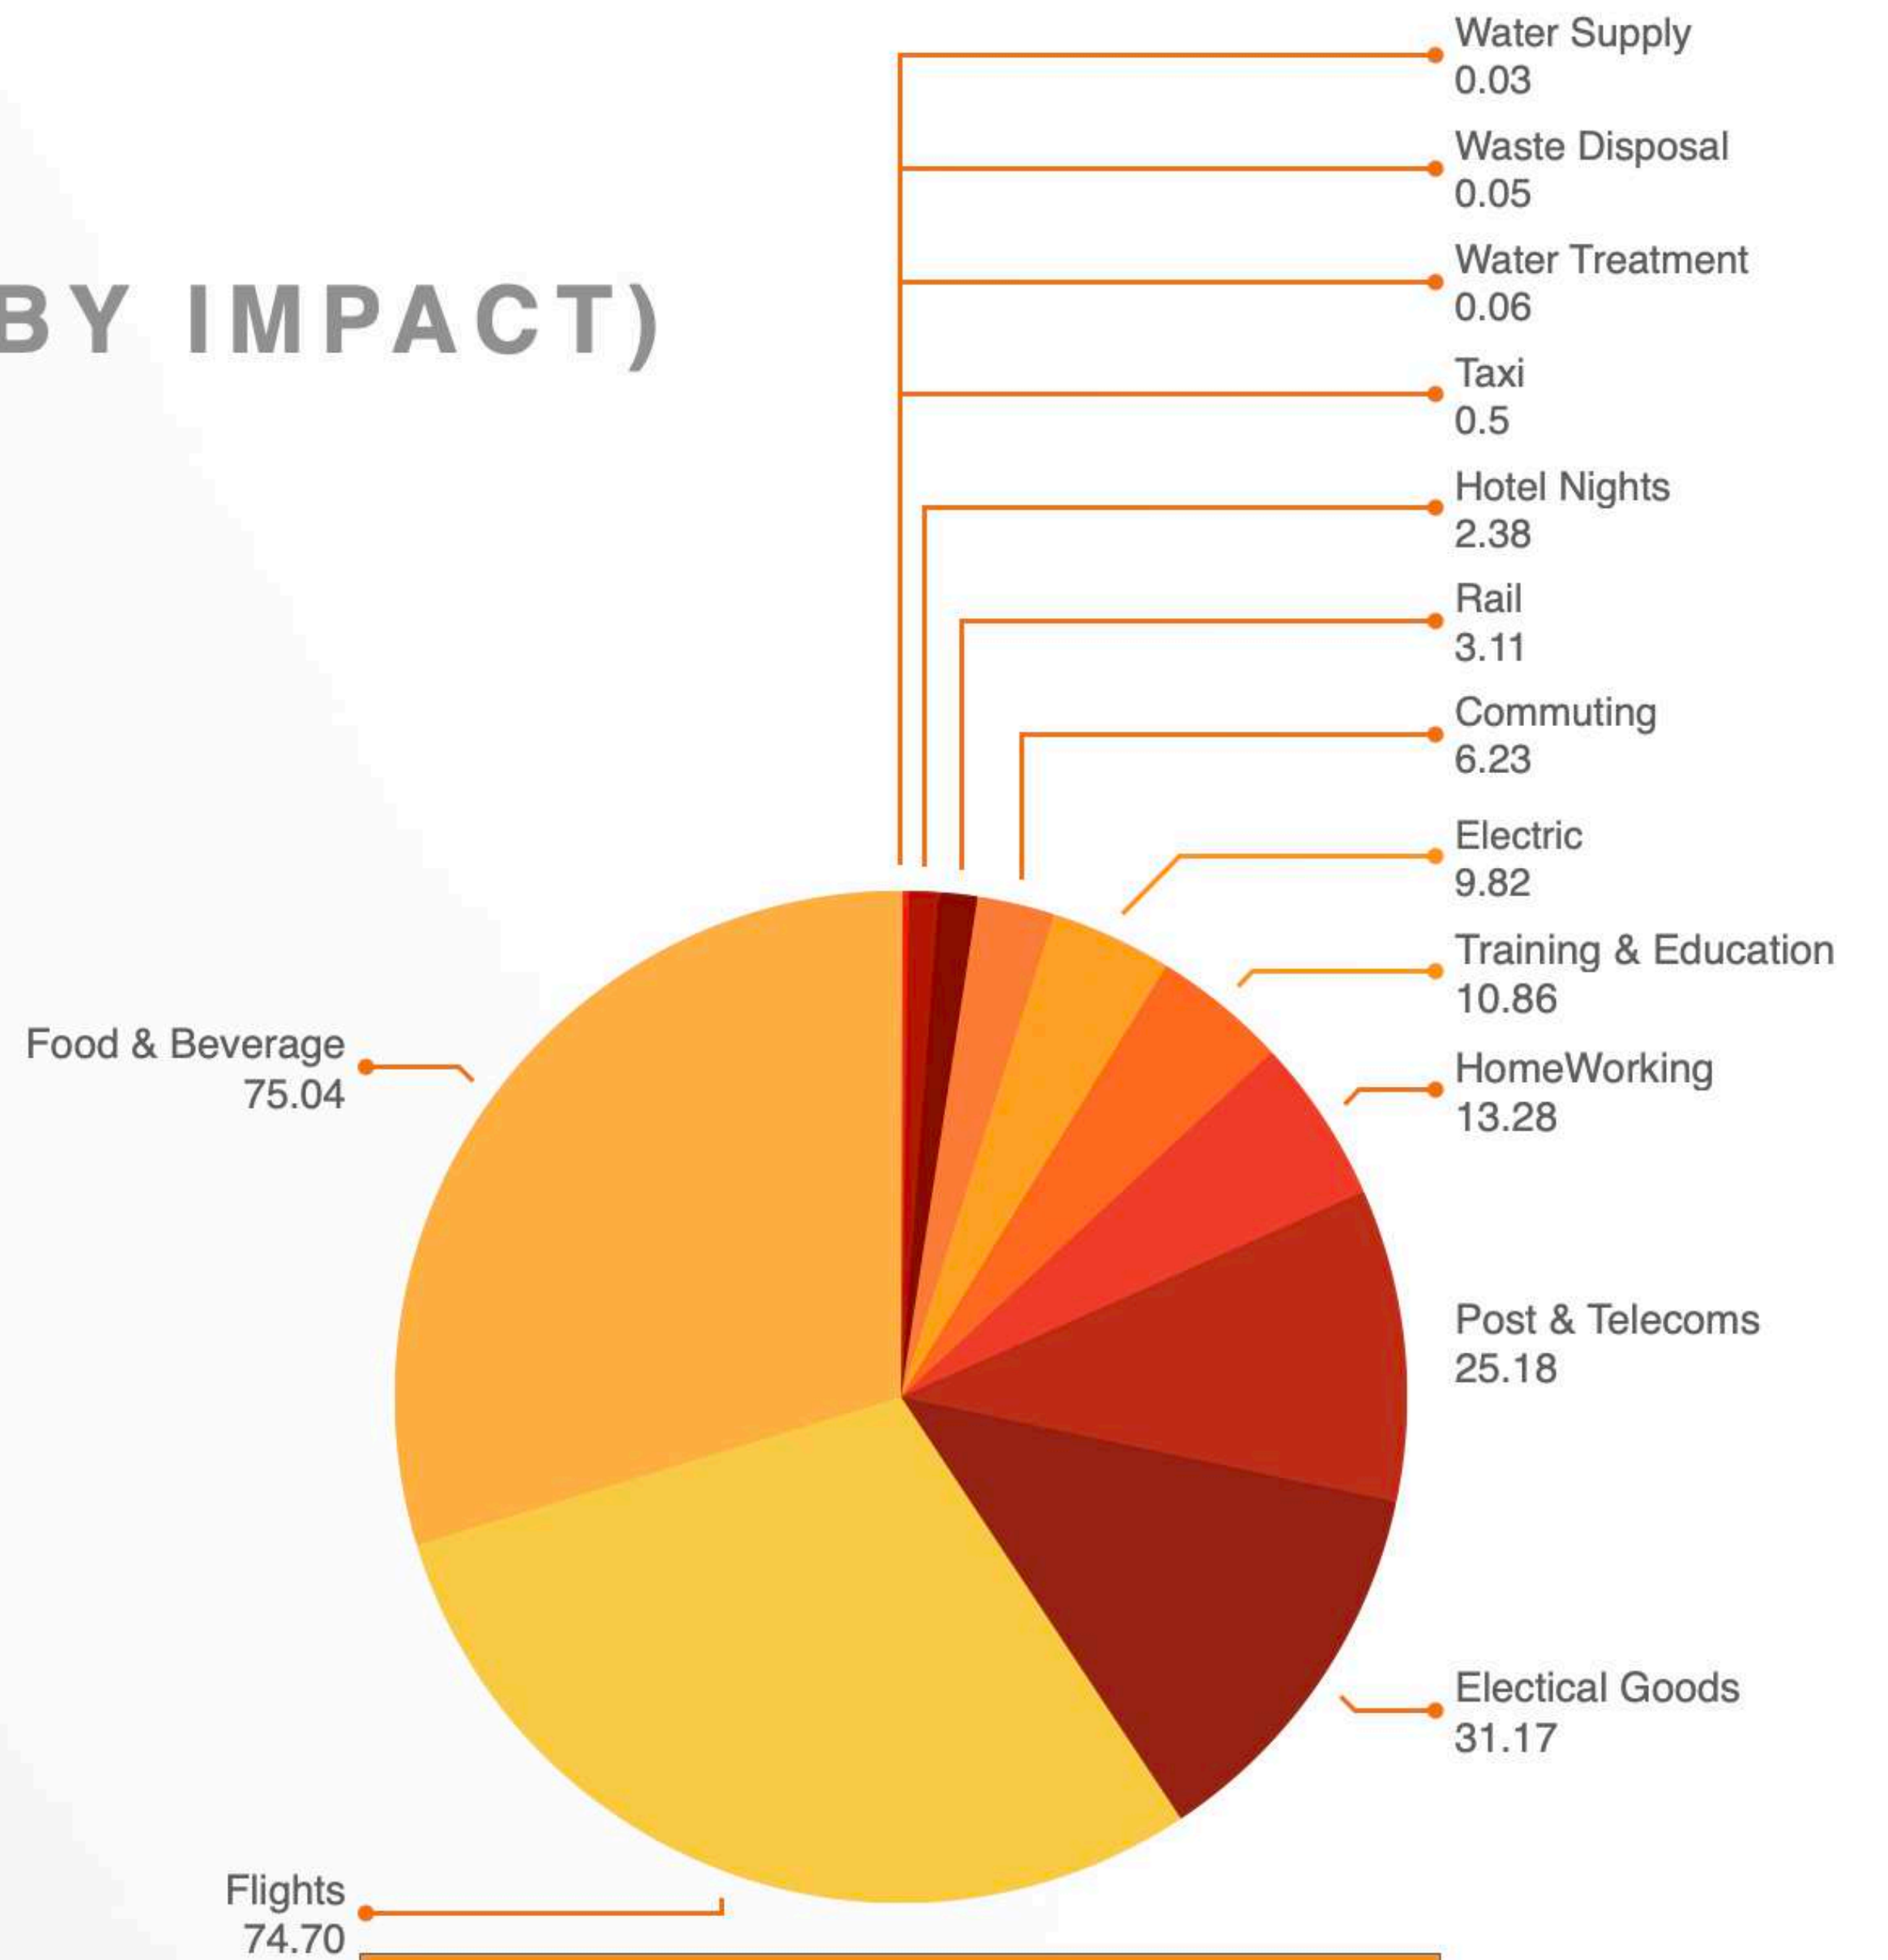

CARBON FOOTPRINT (BY IMPACT)

KEY PRODUCTION

CARBON FOOTPRINT IN 2023:
252.4 Tonnes CO2

Carbon Balancing under Plan Vivo

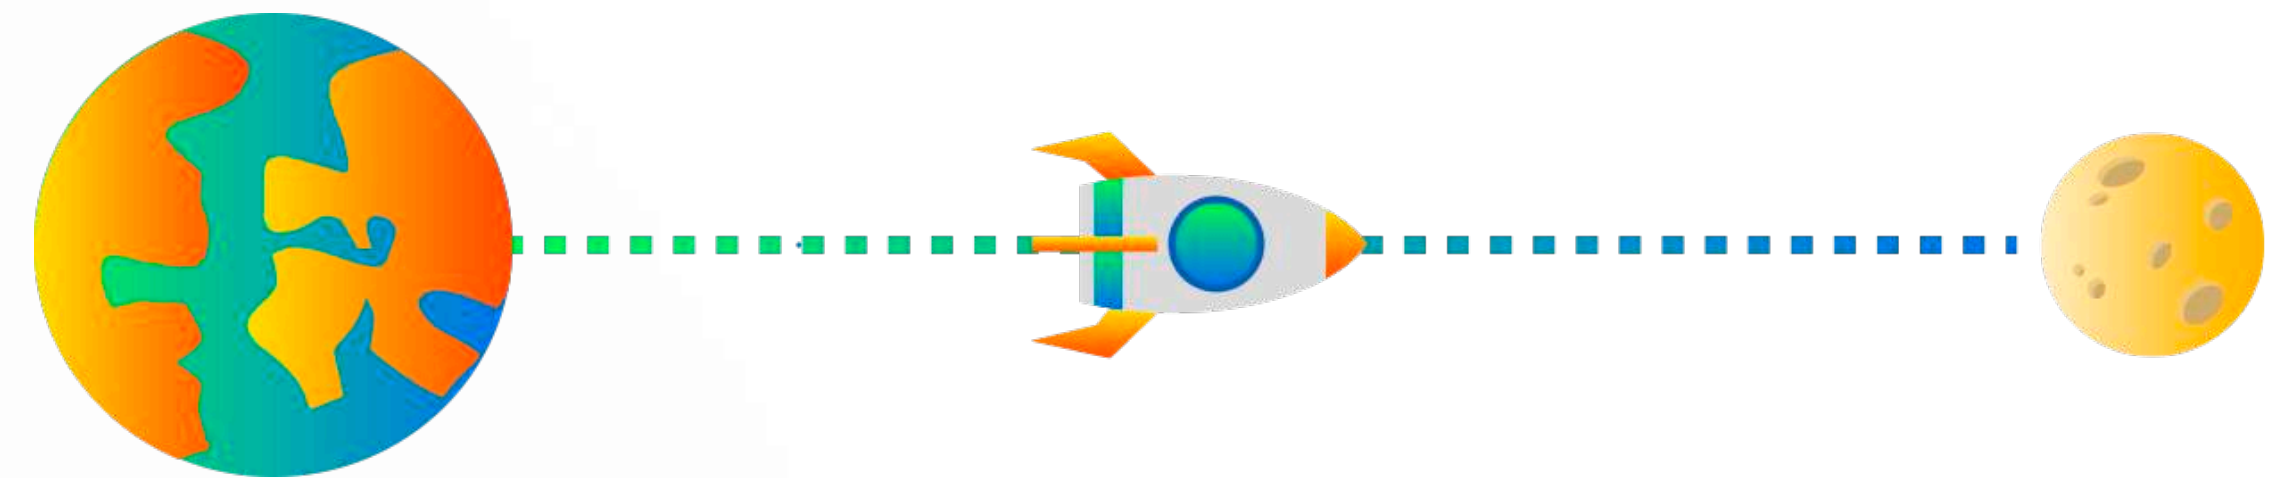

BIGGEST IMPACTS
29.73% FROM FOOD & BEVERAGE
29.6% FROM FLIGHTS

FLIGHT CARBON FOOTPRINT = Total KM travelled
361,311.11 Air km

9.02 X AROUND THE WORLD

0.47 X TO THE MOON AND BACK

UNDERLYING DATA OVERVIEW

SCOPE*	IMPACT	QUANTITY	UNITS
SCOPE 2	Electricity	40,266	kWh
SCOPE 3	Rail	87,718.69	km
	Flights	361,311.11	km
	Taxis	2,424	km
	Commuting - Car	26,822.82	km
	Hotel Nights	108	room.night
	Commuting - Tube	11,710.4	km
	Commuting - Rail	27,162.36	km
	Commuting - Bus	3,849.4	km
	HomeWorking	38,969	Per FTE Working Hour
	Electrical Goods	27,149	£
	Post & Telecoms	59,959	£
	Training & Education	25,018	£
	Food & Beverage	47,431	£
	Water Supply	205.28	m3
	Water Treatment	205.28	m3
Waste Disposal	0.1	Tonnes	

*Method: C Level data gathering and footprint based on DEFRA guidelines and GHG protocol for calculating CO2e.

• CARBON •
BALANCED

BY C LEVEL

This is to certify that:

Are compensating for their carbon footprint by protecting and restoring indigenous forests with local communities

Key Production has committed to offsetting 200% of its carbon emissions for 2023 (278 Tonnes CO2) , totaling 556 tonnes of CO2

Carbon Balanced through the world's most holistic carbon projects under the Plan Vivo Standard:

- COMMUNITREE IN NICARAGUA •

Thank you!

Daren Howarth
CEO, C Level Earth Limited

Communitree in Nicaragua

CARBON BALANCED *bring carbon down to earth*

- Accredited & independently verified Carbon Projects under the world's original standard
- Full Transparency on the IHS Markit Environmental Registry.
- Forest restoration & forest protection, certified Carbon Balanced
- Delivered by communities with full agency on their own land

COMMUNITREE IN NICARAGUA

In the 13 years we have worked with CommuniTree it has gone from a vision to being Nicaragua's biggest reforestation programme. Communitree and partner Taking Root, has developed a globally significant monitoring and reporting platform. This platform combines satellite imagery and on the ground monitoring to design, manage, track and scale forest carbon projects with smallholder farmers. It is now being called on to develop other community projects.

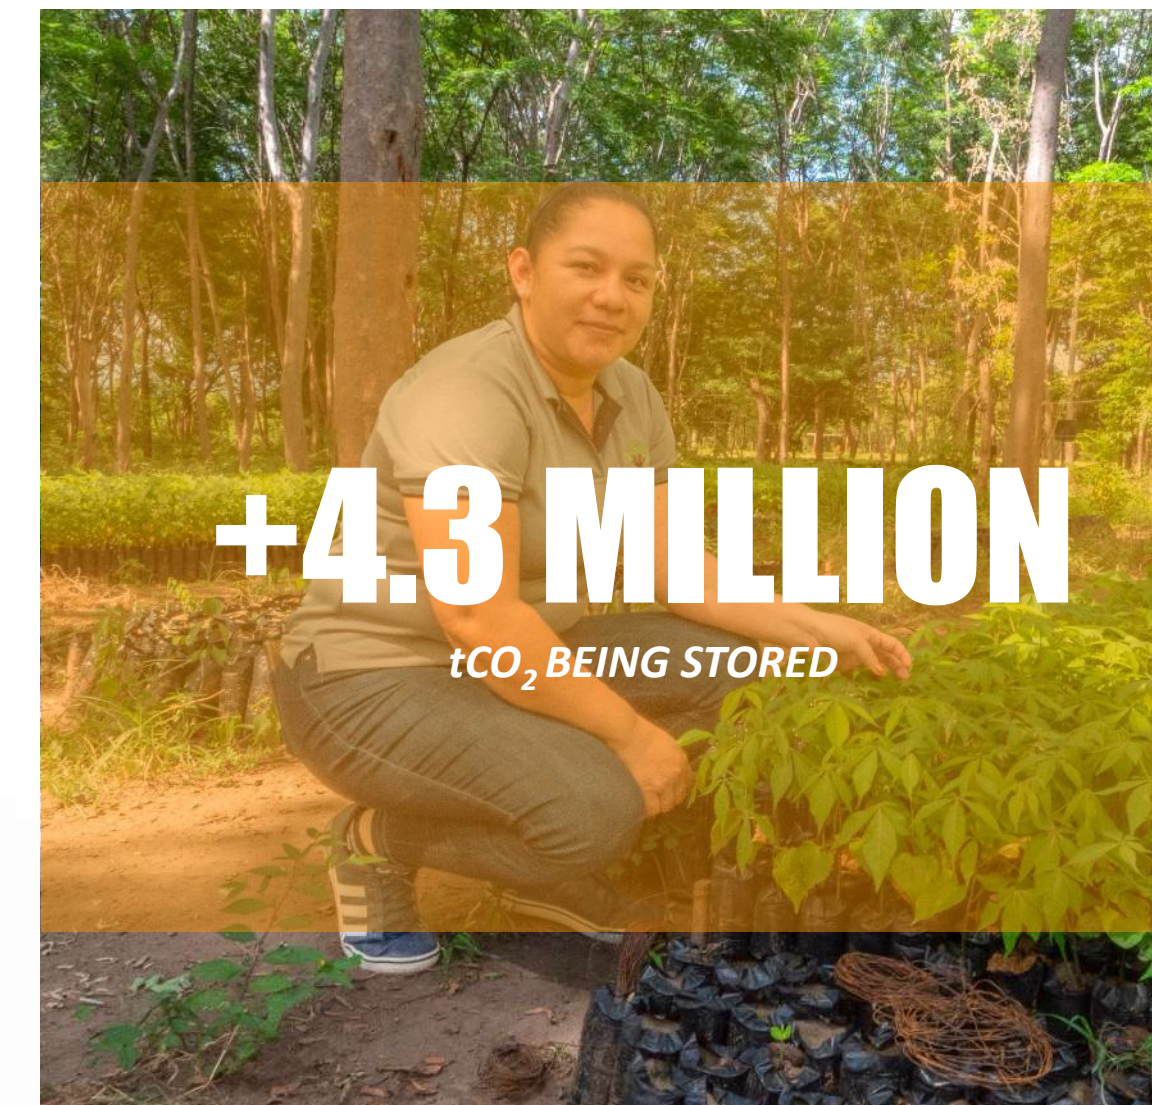

COMMUNITREE - FIRST THIRTEEN YEARS

- 2010 - CommuniTree Program in Nicaragua becomes a certified Plan Vivo Project,
- 2012 - 100,000 tonnes of CO2 being sequestered
- 2013 - 1,000,000 trees planted
- 2015 - wins Monitoring Award from Rainforest Alliance
- 2016 - first coffee agroforestry forests planted to help coffee farmers adapt to climate change
- 2016 - \$1,000,000 being directed to over 500 farmers reforesting their land
- 2018 - Taking Root's technology platform enables monitoring & reporting for smallholder farmers, created with University of British Columbia
- 2018 - CommuniTree model presented to the United Nation's Food and Agriculture Organization
- 2018 - Governor General of Canada honours founder with the Meritorious Service Cross
- 2019 - CommuniTree model is applied to reforestation projects in El Salvador and Ivory Coast
- 2019 - CommuniTree program becomes largest reforestation project in Nicaragua
- 2020 - CommuniTree projects spread to 3 continents and 9 countries around the world
- 2020 - Nicaragua team grows to over 50 staff, Canada team grows to 15
- 2020 - over 10,000,000 trees planted, over 1,000,000 tonnes of CO2 being sequestered
- 2020 - \$6.9 million being directed to 1500 farming families
- 2021 - project team one of the founding 50 implementers of the UN Decade on Ecosystem Restoration
- 2021 - several large companies discover the project including Microsoft
- 2021 - Google supports the project team through Google Accelerator programme for tech startup initiatives
- 2022 - CommuniTree is now Plan Vivo's largest project generating over 1,000,000+ Plan Vivo Certificates in 2022.
- 2023 - Continued project success see the project generate 4,316,143 Plan Vivo Certificates in 2023.

COMMUNITREE - RESTORE FORESTS

- CommuniTree is now Plan Vivo's largest project generating over 1 million Plan Vivo Certificates in 2022.
- Over 67 million tree seeds collected in 2023 and 914 new farming families have joined the programme.
- Over 6 million trees planted in 2022 and sloths, anteaters and other wildlife returning at scale.
- Taking Root's Technology Platform enables project scaling, supported by Google Startups Cloud Programme.
- Taking Root Founder Kahlil Baker, named British Columbia's climate tech leader
- CommuniTree is acting as a model now for new projects in 9 countries.
